Training and Education

Idaho State University (ISU), Pocatello, Idaho

1969–1971

- Health Physics Program that included two summer internships with INEEL

DOE certified since 1974
Respirator Qualified, including SCBA and Airlinehood
Lead, cadmium, and asbestos trained
40-hour Hazqhhoper
CIRCLA trained
Clearance Level Q with PSAP

Work Experience

Health Physics Technician/Radiological Control Technician (RCT)

Mar 74–Jan 2012

INEEL, 2475 E. Fremont, Idaho Falls, Idaho

- *worked with all aspects of radiological control during the course of my career*
- provided radiological coverage for fuel dissolution
- worked with construction crew to provide radiological coverage
- worked as technician in charge of radiological instrumentation
- entered dosimetry data into computer for 10 years; issued and controlled dosimetry badges; did these duties besides normal RCT duties
- provided radiological coverage on D and D projects
- experienced at generating radiation work permits
- currently lead RCT for contract technicians doing DND work

Health Physics Technician/Radiological Control Technician (RCT)

1971–1972

Newport News Refueling at Naval Reactors Facility at INEEL

- provided radiological control coverage for the refueling of A1W reactor; included installing the new Nimitz class reactor head
- provided monitoring during the handling of fuel rods (also did this with fuel dissolution)
